

Gets hotter. Heats faster. Works magic.

Get professional iron-on results without the guesswork. With its unique edge-to-edge heat plate, perfectly even heat up to 400°F, and three new sizes to suit any iron-on project, UOPRESS gives you flawless transfers and lasting results.

How it works

The speed of a heat press.
The convenience of an iron.

Set time and temp

Our Interactive Quick Reference Guide means no more guesswork.

Add a little pressure

The evenly heated plate adheres your iron-on film in 60 seconds or less.

Enjoy lasting results.

Even after repeated washes, your designs will really stick.

Details

Safety first. Creativity always.

Its large handle makes it extra easy to maneuver. The insulated Safety Base keeps it protected when not in use. And its auto-shutoff feature turns it off after 10 minutes of inactivity. All so you can keep your mind in creative mode, not worry mode.

Feature summary

Pro-level performance. Home-friendly design.

Professional iron-on results in 60 seconds or less.

UOPRESS delivers fast and foolproof results that really stick, wash after wash. Now in 3 sizes.

Advanced heat plate design.

Ceramic-coated surface and two unique heating elements create edge-to-edge heat for flawless transfers.

Incredibly simple.

Check the Interactive Quick Reference Guide, enter time and temperature, and press Go – that's it!

Precise temperature control up to 400°F (205°C).

Super-safe.

Insulated Safety Base keeps the heat plate safe and protected; auto shutoff feature turns it off after 10 minutes of inactivity.

An ideal DIY tool.

Lightweight, portable, easy to store, and compatible with most major brands of heat-transfer vinyl (HTV).

So many hot possibilities.

Make baby gear, T-shirts, team wear, shopping totes, canvas shoes, blankets, and more. Try it on wood!

A perfect complement to UOPRESS smart cutting machines.

Design and cut your own iron-on image, then adhere them perfectly. It's as easy as that.
